

FEATURED COURSE
DRYSTONE WALLING

NEW FROM APRIL 1ST 2024!

If you have patches of dry stone wall needing repair, we can run this course on your farm for up to 6 people. (2 minimum). Our main Instructor is a DSW contractor with 30 years experience in the sector and can work throughout Wales. It would be helpful if you send us a photo of the wall repair so Instructor can see before the day. This course is an introduction to the maintenance and construction of traditional farm boundaries to enable learners to undertake basic dry stone wall maintenance and repair.

Sessions:

- ✓ Awareness of safety procedures
- ✓ Prepare a base to repair
- ✓ Selecting and sorting stone- regional variations
- ✓ Dry stone walls as historic landscape and habitat and shelter value

This is a **1 day** practical outdoor course, so we can run it on farm on a wall that need repair. Ideally as close as possible to sheds/house/for welfare reasons- not a 2 hour walk to the site! Up to 6 candidates is ideal but can do in some circumstances for 2, so if you have walls that need repair, see if there is any local interest and you can all apply together so we can run the course with you. We can help you apply with a **10 minute ZOOM** call at a time to suit you- when you have access to your FC email for the verification process.

THIS COURSE IS ELIGIBLE FOR **80% FUNDING.**

PRICE FOR APPLICATION: £265 YOU WILL PAY £53 + VAT
